Mon, 25 Jun 2018 04:43:00 GMT - The introduction of the shorter match formats for cricket (i.e. Twenty20) requires batsmen to be proficient in sprint acceleration to increase run scoring potential. Therefore, the study aim was to identify the kinematics of faster acceleration performance of non-striking batsmen when completing a quick single.

This position allows the athlete to apply more force and recruit muscle mass to overcome gravity. Starting and acceleration differ enormously from constant speed or maximal speed.

Mon, 06 Aug 2018 14:15:00 GMT - which way and how fast the object is moving. acceleration Acceleration a is a vector, with units of meters per second squared ($G s^2 m$). Acceleration indicates the rate of change of the object's velocity ($v G$); i.e., the acceleration tells you how fast the object's velocity is changing.
