Thu, 09 Aug 2018 06:41:00 GMT - COLOR VOCABULARY COLOR The character of a surface that is the result of the response of vision to the wavelength of light reflected from that surface. You see what is reflected, not what is absorbed by the surface. SPECTRUM The band of individual colors that results when a beam of light is broken into its component wavelengths of hues.

COLOR VOCABULARY - Columbus County Schools -

- Planetshine is the dim illumination, by sunlight reflected from a planet, of all or part of the otherwise dark side of any moon orbiting the body. The most observed and familiar example of planetshine is earthshine (also called

earthlight) on the Moon, which is most visible from the night side of Earth when the lunar phase is crescent or nearly new, without the atmospheric brightness of the ...
