Mon, 20 Mar 2017 23:59:00 GMT - An essential oil is a concentrated hydrophobic liquid containing volatile (defined as "the tendency of a substance to vaporize") aroma compounds from plants. Essential oils are also known as volatile oils, ethereal oils, aetherolea, or simply as the oil of the plant from which they were extracted, such as oil of clove. An oil is "essential" in the sense that it contains the "essence of" the ...

Mon, 06 Aug 2018 02:13:00 GMT - The essential oils and oleoresins cover a very broad range of products, used primarily as flavours and fragrances, but many essential oils also have a long history of traditional usage as medicines and as food supplements to support good health, while some are also used as a feedstock to the chemicals industry.

**Essential Oils and Oleoresins -**

- Essential fatty acids, or EFAs, are fatty acids that humans and other animals must ingest because the body requires them for good health but cannot synthesize them.. The term "essential fatty acid" refers to fatty acids required for biological processes but does not include the fats that only act as fuel.
