Sat, 28 Jul 2018 09:18:00 GMT - The Atacama Desert is commonly known as the driest nonpolar place in the world, especially the surroundings of the abandoned Yungay town (in Antofagasta Region, Chile). The average rainfall is about 15 mm (0.6 in) per year, although some locations, such as Arica and Iquique, receive 1 to 3 mm (0.04 to 0.12 in) in a year. Moreover, some weather stations in the Atacama have never received rain.

Wed, 08 Aug 2018 18:02:00 GMT - The past three years have seen the return of widespread rainfall deficiencies across southern and eastern Australia (Figure 1). Below-average rainfall across large parts of Australia since the end of the 2010 and 2011 La Niña events, and the failure of the northern wet season in much of inland Queensland over the past three years, have contributed to these deficiencies (see the latest issue ...
