the social animal pdf -

Sat, 16 Jun 2018 00:57:00 GMT - Sociality is the degree to which individuals in an animal population tend to associate in social groups (gregariousness) and form cooperative societies.. Sociality is a survival response to evolutionary pressures. For example, when a mother wasp stays near her larvae in the nest, parasites are less likely to eat the larvae. Biologists suspect that pressures from parasites and other predators ...

Tue, 19 Jun 2018 02:55:00 GMT - Ethology is the scientific and objective study of animal behaviour, usually with a focus on behaviour under natural conditions, and viewing behaviour as an evolutionarily adaptive trait. Behaviourism is a term that also describes the scientific and objective study of animal behaviour, usually referring to measured responses to stimuli or trained behavioural responses in a laboratory context ...

Ethology - Wikipedia -

- The meerkat's diet is mainly insectivorous, but they will also consume lizards, snakes, spiders, plants, eggs and small mammals. Like all mongoose species, the meerkat has developed an immunity to many venoms.
