Fri, 12 Oct 2018 06:22:00 GMT - solar energy drove wind and rain, grew trees, and grew crops to nourish our animals and ourselves. All these energy sources were also renewable, since wind kept blowing, rivers kept flowing, and trees and crops kept growing. About 1800, we began to get much of our energy from coal dug out of the ground. About 1900 we began to drill for oil and natural gas.
